PROFILE

I'm a BSc Computer Science student at UAF with two years of daily client support in Urdu and English (phone, email & WhatsApp) at Aptly Pharmaceuticals, maintaining a **92%** customer satisfaction (CSAT) score. That work trained me to quickly catch small language mistakes, tone shifts, and meaning changes. Through real projects I've also become careful with data consistency and labelling.

LANGUAGE PROFICIENCY

Urdu C2 (Native): Reading, Writing, Listening, Speaking. Faisalabad accent. Comfortable with Lahori and Karachi speech patterns too.

English (B2): Reading, Writing, Listening, Speaking. Used daily in client support. Clear enough for professional work.

Punjabi (Fluent): Everyday language for me. Helps with dialect and cultural context in annotation work.

EXPERIENCE

Aptly Pharmaceuticals

Jun 2024 - Present

- Faisalabad, Pakistan

Customer Support & Operations Specialist

- Handle daily client calls, emails and WhatsApp support in Urdu and English, focusing on clear communication and accuracy.
- Found a repeated date-format problem (DD/MM vs MM/DD) in the inventory data that had been throwing off monthly reports for months. Fixed it after noticing the pattern.
- Deal with high-priority and unclear cases on my own when there's no clear next step. Those decisions have held up when reviewed later.
- Built some Python + Excel scripts that automated parts of the monthly reporting.

PROJECTS

Pharmaceutical Workbook:

Aptly Pharmaceuticals | Excel | 2024 - Present

- Built a 12-sheet validation workbook that replaced the old manual spreadsheets. Cut data-entry errors by half.

Reporting Automation:

Aptly Pharmaceuticals | Python / openpyxl | 2025 - Present

- Automated pulling sold items from monthly files into clean templates. Error rate dropped close to zero.

RELEVANT SKILLS

Audio / Annotation: Transcription accuracy, noticing accent differences, basic prosody awareness, careful data labelling

Data & Tools: Python (openpyxl), Advanced Excel, Google Workspace, VS Code

Work Style: Highly focused, can work independently, meets deadlines, fine with remote work

EDUCATION

BSc Computer Science

Sep 2024 - Expected 2028
